Contin⊌ation Sheet (PTOL-303)

Continuation of 2. NOTE: Applicants added ilmitations that were not previously recited which will require further search. The reference to Okada still meets the stop control recited in claim 10. Further, Applicant's request to withdraw the finality has been taken in consideration. However, the finality still stands. In Paper No. 10, August 13, 2002, the Applicants filed a response which contains new subject matter. In response to that communication, the Examiner submitted a final rejection in which she objected to claims 8 and 10. On Paper No. 13, the Applicants submitted an after final in the attempt to get the claims allowed. The after final (Paper No. 13) was not enetered because while reviewing the application, the Examiner realized that the objected claims 8 and 10 in the prior office action was misinterpreted and could have been rejected using the arts of record, The Examiner then withdrew the final office action and submitted another final office action in which claims 8 and 10 got properly rejected. With the withdrawal/cancellation of the first final office action (Paper No. 12), note that the Examiner is responding to the amendment submitted/filed by Applicant in Paper No. 10 which contains the new matter. With that said, the Examiner believes that the final office action was appropriate since it was submitted as a response to the amendment filed by Applicant which contains new matter. By that action, the response time was restarted, giving the applicant ample time to formulate an appropriate response.
